

## NEW PRODUCT OFFERING FROM HATCH & KIRK

Hatch & Kirk is pleased to announce the availability of Genuine HK remanufactured GE 7FDL engines. These engines are available in 8, 12 and 16 cylinder configurations and are sold on a UTEX, outright or repair and return basis. All GE engines are load tested for a minimum of eight hours prior to shipment. All engines ship with a complete Engine Handbook that includes all of the build data and specifications along with an engine maintenance manual.

All Hatch & Kirk engines are remanufactured under our AAR M-1003 quality designation using the specifications set forth by the OEM manufacturer. Engines are remanufactured to customer specifications and can be shipped globally.

For decades, Hatch & Kirk has been known for manufacturing and distributing the highest quality engine parts and engines used in rail, marine and stationary applications. From our facilities in Seattle Washington and Alton Illinois, we support the largest transportation, industrial and governmental entities operating in the most demanding applications.
